

ECO-GLOW 100 PL

Exterior grade photo-luminescent coating

Two Pack Flexible Self Priming high hysteresis waterproofing membrane designed for on-site application to walkways, bridge rails, tunnels and building entrances, concrete coving, wharfs and jetties, roof top walkways, steps, stairs and ladders or any substrate that needs to be visible during the hours of darkness

that also requires toughness, UV stability and a high degree of protection from water ingress. Contains a high performance, long lasting photo-luminescent pigment with high luminescence value and rapid recharge. Eco-Glow 100 PL is a zero VOC product suitable for most substrates

- Single high build capability application
- Superior shore hardness, prevents coating wear and tear
- Ideal viscosity, supports roller, brush and spray applications
- Exceptional adhesion, bonds to multiple substrates
- 8 to 10 hours of visible glow performance
- Contains latest German technology components
- **Eco-glow 100 PL is manufactured in New Zealand by IDEALS LTD .**
